## **Seeking Youth-Led and Youth-Focused Presentations!**

Are you part of a successful project or program that is making a difference in your community? If so – we want to hear from you!

The 2021 AFE Youth Track is seeking to feature youth-led and adult partnered projects or programs that target middle school, high school or college-aged students. In particular, we are seeking youth-led projects and programs that are making a difference through youth participation in biological and ecological research, environmental conservation and advocacy.

Have you developed a successful community, environmental or natural resource focused program in your community? Have you experienced a program that has inspired you to take action in your community? Have you been able to create partnerships and collaborations with community members to achieve your goals? Have you learned valuable knowledge from your elders and community members that you’d like to share?

If you answered yes to any of those questions, please consider submitting a presentation proposal for the 2021 AFE Youth Track! There are a few different presentation options available as this year’s Forum is virtual.

To apply or nominate a project from your community, please fill out the Google form application below:

[Application Form Virtual Youth Track AFE 2021](#)

### **Important Dates:**

Alaska Forum on the Environment– February 8th – 12th, 2021

Youth Track Sessions – February 8th - 12th, 2021
